DETAILED ACTION

1. Amendment received on May 26, 2004 has been acknowledged. Drawing corrections have been approved.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, the recitation "a customer" at lines 6, 8 and 12" renders the claim indefinite since it is unclear if applicant is referring to the same customer of line 4.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sadler (6,571,218). As best understood, Sadler discloses the commodity order taking method of recording an order on a slip (via printed receipt) from each customer in advance (at terminal 12) of data entry of such order (as illustrated at step 84) then

Art Unit: 3627

handing the slip to a customer before the order is accepted (via printed 22). Sadler further discloses passing the slip from a customer to a store terminal (via terminal 36). Sadler further discloses reading the slip (via scanning in step 90). Further, entering data recorded on the slip into a register (via cashier operated store terminal 36), thereby identifying the customer with order content data entered into the register (as disclosed in steps 92 and 94). Although the order check-out of Sadler is not performed at an order window, however it would have been an obvious matter design choice to one of ordinary skill in the art at the time the invention was made to have modify the personnel-operated terminal of Sadler, since applicant has not disclosed that the order window solves any stated problem or is for any particular purpose and it appears that the invention would perform equally well with an store personnel-operated terminal.

Response to Arguments

6. Applicant's arguments with respect to claim 1 and 11 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3627

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
